

Disk Module TDM 0.05

- 1 **thin disk pump module** for laser disks mounted on standard D+G heat sink
- 2 fiber delivery (SMA connector) of pump power
 - for applications requiring **low pump power (< 50 W)**
 - preserves polarization of the pump radiation
 - wide pump wavelength range 650 nm ...1050 nm
- 3 easily exchangeable, and adjustable **collimation optics**
- 4 water cooled or Peltier cooled (TEC version) **disk holder** (adjustable in position)
- 5 **pump arrangement** for 12, 20, or 28 passes of pump light through disk
